STATE PROGRAMS:

1301110000 000000 COMM SUBSTANCE ABUSE SERV

PURPOSE:

BE/OCA combination captures allowable costs of medication-assisted treatment (MAT) services for the treatment of opioid use disorder associated with the State Targeted Response to the Opioid Crisis Grant awarded by the Substance Abuse and Mental Health Services Administration (SAMHSA) as a two year discretionary grant.

Eligibility includes individuals who are indigent, uninsured, or underinsured and have an opioid use disorder. The following individuals who misuse opioids should be given preference in admissions in the following order:

1. Pregnant women who are injecting opioids; 2. Pregnant women; 3. Caretakers involved with child welfare; 4. Caretakers of children ages 0-5; and 5. Individuals re-entering the community from incarceration.

The following covered services described in ch. 65E-14.021, F.A.C., are allowable uses of these funds when provided to individuals in conjunction with methadone maintenance or buprenorphine maintenance. These funds may also be used to support individuals receiving VIVITROL, except for Assessment, Medical Services and Medication-Assisted Treatment, as this will be paid through the Florida Alcohol and Drug Abuse Association.

Aftercare; Assessment; Case Management; Crisis Support/Emergency; Day Care; Day Treatment; Incidental Expenses (excluding housing/rental assistance and direct payments to participants); In-Home and On-Site; Medical Services; Medication-Assisted Treatment (only methadone or buprenorphine maintenance); Outpatient; Outreach (to identify and link individuals with opioid use disorders to medication-assisted treatment providers); Recovery Support; Supported Employment; Supportive Housing/Living; Inpatient Detoxification; and Residential Levels I and II. Funds may also be used to pay for Substance Abuse Outpatient Detoxification.

Inpatient detoxification and residential services may only be used to stabilize and transition eligible individuals to medication-assisted treatment. Inpatient detoxification may be used in conjunction with buprenorphine or methadone induction, as medically indicated. Residential services may be utilized to provide a safe and supportive transition during opioid withdrawal for those entering an extended release naltrexone (Vivitrol) program. Post injection, individuals must be assessed and linked to the determined level of care.

SOURCE OF MATCH: This BE/OCA combination is 100% funded by the Federal Government; therefore, no match is required.

COST ALLOCATION METHODOLOGY: Costs associated with this BE/OCA combination are directly charged State Targeted Response (STR) to the Opioid Crisis Grant.

BUDGET RESTRICTIONS: Funds may not be expended by any agency which would deny any eligible client, patient or individual access to their program because of the use of FDA-approved medications for the treatment of substance use disorders (e.g., methadone, buprenorphine, or naltrexone). In all cases, MAT must be permitted to be continued for as long as the prescriber or treatment provider determines that the medication is clinically beneficial. Grantees must assure that clients will not be compelled to no longer use MAT as part of the conditions of any programming if stopping is inconsistent with a licensed prescriber's recommendation or valid prescription. Additionally, Opioid STR funds may not be used for the following purposes: To provide services to incarcerated populations (defined as those persons in jail, prison, detention facilities, or in custody where they are not free to move about in the community); to make direct payments to individuals as a reward for attendance and/or goal attainment; to pay for covered services not listed in this Chart 8, housing, construction or purchase of structures; to supplant (or replace) existing funds for svcs.

SOURCE OF FUNDS: This BE/OCA combination is funded through the Substance Abuse and Mental Health Services Administration, State Targeted Response to the Opioid Crisis Grant.
